PROFESSIONAL SUMMARY

Software Engineering student at Injibara University and aspiring Web Developer with hands-on experience building modern web applications using React, JavaScript, Node.js, Express.js, and PostgreSQL.

Passionate about developing responsive user interfaces, designing REST APIs, working with relational databases, and building full-stack applications. Experienced with authentication, JWT, API integration, Git/GitHub, and modern frontend development practices.

Currently focused on improving full-stack development skills and building practical applications that solve real-world problems.

TECHNICAL SKILLS

Frontend Development

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- React Hooks

- React Router
- Tailwind CSS
- Responsive Web Design
- REST API Integration
- Axios / Fetch API

Backend Development

- Node.js
- Express.js
- REST API Development
- JWT Authentication
- Middleware
- API Routing
- Controller / Service / Model Architecture

Database

- PostgreSQL
- SQL
- Database Design
- Table Relationships
- Primary & Foreign Keys
- Constraints
- CRUD Operations
- Joins and Queries

Tools

- Git
 - GitHub
 - VS Code
 - Postman
 - npm
 - Vite
-

EDUCATION

Bachelor of Science in Software Engineering

Injibara University — Ethiopia

Status: Student

Expected Graduation: 2020

Relevant areas of study:

- Software Engineering
- Web Development
- Database Systems
- Programming
- Data Structures
- Computer Science Fundamentals

PROJECTS

Student Registration System

Full-Stack Web Application

Technologies: React, Tailwind CSS, Node.js, Express.js, PostgreSQL, JWT

- ❖ Developed a full-stack student registration system with separate functionality for administrators, teachers, and students.
- ❖ Built responsive React interfaces for different dashboard experiences.
- ❖ Developed REST APIs using Node.js and Express.js.
- ❖ Designed and managed PostgreSQL database tables and relationships.
- ❖ Implemented JWT-based authentication and protected API routes.
- ❖ Organized backend code using a feature-based architecture with separate models, services, controllers, and routes.
- ❖ Tested backend APIs using Postman.

Todo List Application

Technologies: React, JavaScript, Tailwind CSS

- ☐ Developed a responsive task management application.
- ☐ Implemented adding, updating, completing, and deleting tasks.
- ☐ Used React state management to handle application data.
- ☐ Created a responsive user interface using Tailwind CSS.

Currency Converter

Technologies: React, JavaScript, REST API

- Built a currency conversion application using React.
- Integrated an external exchange-rate API.
- Implemented dynamic currency selection and conversion.
- Used React state and effects to manage API data and application updates.
- Designed a responsive interface for different screen sizes.

Calculator Application

Technologies: React, JavaScript, Tailwind CSS

- Developed a responsive calculator using React.
- Implemented arithmetic operations and interactive buttons.

- Used React state to manage calculator values and operations.
 - Designed the interface with responsive Tailwind CSS styling.
-

DEVELOPMENT EXPERIENCE

Full-Stack Web Development — Personal & Academic Projects

- ❖ Built frontend applications using React and modern JavaScript.
 - ❖ Developed backend REST APIs using Node.js and Express.js.
 - ❖ Connected React applications to backend APIs using Axios and Fetch.
 - ❖ Worked with PostgreSQL for persistent data storage.
 - ❖ Implemented authentication using JWT and password hashing with bcrypt.
 - ❖ Tested and debugged APIs using Postman.
 - ❖ Used Git and GitHub for source-code management.
 - ❖ Practiced feature-based project organization for scalable applications.
-

CORE STRENGTHS

- Problem Solving
- Continuous Learning
- Full-Stack Development
- API Development
- Database Design
- Responsive UI Development
- Debugging
- Team Collaboration
- Attention to Detail

LANGUAGES

- Amharic — Native
- English — Intermediate

ADDITIONAL INFORMATION

Availability: Available for Internship / Junior Developer Opportunities

Preferred Role: Frontend Developer / Backend Developer / Full-Stack Developer
